

# UMAIR ISHTIAQ

+92 316 8795376 | umairishtiaq04@gmail.com | Gujar Khan, Rawalpindi, Punjab

Computer Science Graduate with experience in **Web** and **Flutter** Development. Skilled in developing responsive web designs, cross-platform mobile applications, enhancing website performance, API integration, and improving user experience. Proficient in modern development tools and technologies, with a strong focus on delivering scalable, user-friendly, and platform-independent solutions.

## SKILLS

### Programming

- C++
- JavaScript
- Python

### Framework

- React
- Flutter
- Bootstrap

### Other

- MySQL
- Firebase
- UI/UX

## EXPERIENCE

### Four Elementx Software Solutions (onsite)

#### React Developer

Nov 2024-Mar 2025

I focus on creating user-friendly and responsive web interfaces using React. My responsibilities include:

- Building reusable components
- Managing state and integrating APIs
- Debugging, testing, and optimizing website performance
- I work closely with my team to deliver quality projects on time. I'm also committed to learning new tools, staying updated with the latest web technologies, and continuously improving the user experience while building scalable applications.

### Kartoa Technologies Islamabad (onsite)

#### Internship

June 2023-Sep2023

I served as a Web Developer intern at Kartoa Technologies, where I gained practical experience in Web design and development. I applied various design tools to improve the visual appeal and functionality of websites, contributing to their overall visibility and user engagement.

### Eziline Software house (Remote)

#### Internship

June 2023-Aug 2023

Gained practical experience in **React** and **Bootstrap** by developing and improving multiple web projects. Specialized in creating responsive designs to ensure seamless user experiences across devices.

## EDUCATION

### **Bachelor (BSCS)**

Capital University of Science and Technology, Islamabad

2020-2024

### **Intermediate (ICS)**

Punjab Group of Collage, Gujar Khan

2018-2020

## PROJECTS

- **BidCart: Grocery shopping with bidding (Flutter, FYP)**

BidCart is an online grocery app featuring a bidding system where customers select items, submit requests to local stores, and choose the best offer.

- **IT-Services website (ReactJS)**

It is a website created using ReactJS and EmailJS as a virtual IT-services company.

- **Grocy App (ReactJS)**

Mobile app <https://m.grocy.fourelementx.com/>

- **Currency Converter (Python)**

- **More uploaded on [github.com/Umair-Ishtiaq](https://github.com/Umair-Ishtiaq)**

---

## CERTIFICATION

Flutter Development (**Online**)

Interactivity with JavaScript from University of Michigan (**Coursera**)

Python course from Google (**Coursera**)

ICPC Competition
